Silver Creek®  
STONEWORKS

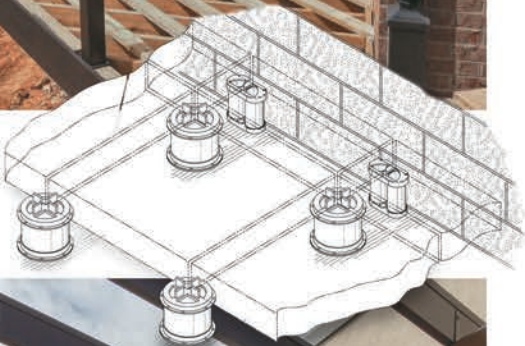

Silver Creek landscape tiles are the newest material choice for patio decking. Property owners will not only enjoy the look and feel of natural stone on their raised patio, they'll never have to scrape, paint, or stain a conventional wood deck again.

Aside from creating valuable and attractive outdoor spaces, rooftop pedestal decks have many benefits. These unique systems can promote energy efficiency, protect membrane roofing, help reduce noise, hide drainage and utilities, and allow easy access to what's below.

Always consult a structural engineer for proper deck design.

# CABINET COLLECTION

KITCHEN CABINETS ARE FOR BACKYARD BAKING, GRILLING, DINING AND ENTERTAINING. ELEGANT, FUNCTIONAL AND AFFORDABLE, THESE HIGH QUALITY KITS & COMPONENTS ARE READY TO ASSEMBLE IN ANY CONFIGURATION YOU CAN IMAGINE.

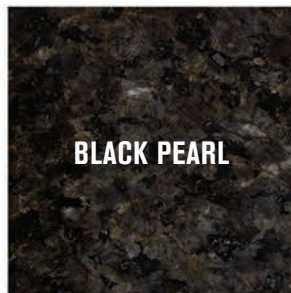

**Kitchen cabinet kits with solid granite tops:**  
 Nearly as durable as diamonds, granite owes its density and hardness to its origins – solidified under extreme pressure deep within the earth. Granite is as durable as it is beautiful; it's not affected by extremes in temperature and under normal conditions, resists etching by knives, household acids and kitchenware. Choose from two granite top colors.

**Besides its beauty, granite is:**  
 - Sanitary; when sealed, granite does not harbor bacteria  
 - Highly resistant to burning or charring from hot pans, appliances, utensils etc.  
 - 100% natural, non-toxic and easy to clean

**Earthy cabinet colors:**  
 Necessaries kits feature Rockwood Retaining Walls' multi-piece, tumbled Lakeland wall block. Its linear design and aged appearance fit well in landscapes of any style or decor. Choose from three cabinet colors.

**Kitchen kits can be ordered with or without tops.**

## PROFESSIONAL GRADE SANDS, CLEANERS AND SEALERS HELP MAINTAIN YOUR PATIO, PATHWAY OR DRIVEWAYS BEAUTY INDEFINITELY.

### CHOOSE A JOINT SAND THAT STANDS UP TO THE DAMAGING EFFECTS OF FREEZE-THAW, EROSION, WEEDS AND INSECTS.

#### Choose the right joint sand the first time

Your paver project represents an investment in your home and the time you spend outdoors. Choose a high-quality polymeric joint sand to protect your investment and minimize your time spent on maintenance. Unlike conventional sands, polymeric sand remains in place, resisting erosion caused by repeated sweeping, wind, rain and even power washing.

#### Eliminate grass and weeds

Weeds and grasses will take root anywhere they can, including your new patio if not sanded properly. Polymeric sand creates an impenetrable sand joint and represents the best defense available against unwanted vegetation.

#### Insect protection

Without the proper protection, ants will take up residence in the spaces between pavers. Like weed prevention, polymeric sand forms an impenetrable barrier against ant and insect tunneling.

### LIKE ANY DECORATIVE EXTERIOR SURFACE, PAVERS AND LANDSCAPE TILES AREN'T IMMUNE TO THE EFFECTS OF TIME AND USE.

#### Keep your investment clean and beautiful

BBQ grease, motor oil, suntan lotion, fertilizer granules, bird droppings, leaf stains, paint and tire marks conspire to dull the beauty of decorative pavement. Sealing products are the optimal prevention against discoloration caused by weathering, UV rays and salt. Over time, the corrosive forces of nature can take a toll on pavers. Applying a protectant slows the march of time.

#### Make surfaces easier to clean

The time and effort required for regular cleaning or preparing to entertain is dramatically reduced if your pavement is protected. Sealers are the ultimate protection against oil and other stains.

#### Choose your look

You can choose the look of your patio, path or drive by the product used to protect its surface. A wet-look or semi-gloss sealer enhances color while matte or natural-look sealers preserve its original appearance. No matter what look you choose, sealing is the essential final step in your project.

# CABINET COLLECTION

KITCHEN CABINETS ARE FOR BACKYARD BAKING, GRILLING, DINING AND ENTERTAINING. ELEGANT, FUNCTIONAL AND AFFORDABLE, THESE HIGH QUALITY KITS & COMPONENTS ARE READY TO ASSEMBLE IN ANY CONFIGURATION YOU CAN IMAGINE.

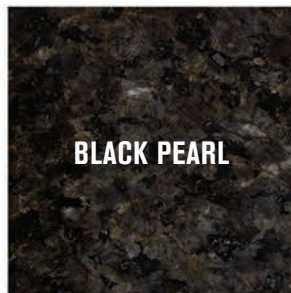

**Kitchen cabinet kits with solid granite tops:**  
 Nearly as durable as diamonds, granite owes its density and hardness to its origins – solidified under extreme pressure deep within the earth. Granite is as durable as it is beautiful; it's not affected by extremes in temperature and under normal conditions, resists etching by knives, household acids and kitchenware. Choose from two granite top colors.

**Besides its beauty, granite is:**  
 - Sanitary; when sealed, granite does not harbor bacteria  
 - Highly resistant to burning or charring from hot pans, appliances, utensils etc.  
 - 100% natural, non-toxic and easy to clean

**Earthy cabinet colors:**  
 Necessaries kits feature Rockwood Retaining Walls' multi-piece, tumbled Lakeland wall block. Its linear design and aged appearance fit well in landscapes of any style or decor. Choose from three cabinet colors.

## PROFESSIONAL GRADE SANDS, CLEANERS AND SEALERS HELP MAINTAIN YOUR PATIO, PATHWAY OR DRIVEWAYS BEAUTY INDEFINITELY.

### CHOOSE A JOINT SAND THAT STANDS UP TO THE DAMAGING EFFECTS OF FREEZE-THAW, EROSION, WEEDS AND INSECTS.

#### Choose the right joint sand the first time

Your paver project represents an investment in your home and the time you spend outdoors. Choose a high-quality polymeric joint sand to protect your investment and minimize your time spent on maintenance. Unlike conventional sands, polymeric sand remains in place, resisting erosion caused by repeated sweeping, wind, rain and even power washing.

#### Eliminate grass and weeds

Weeds and grasses will take root anywhere they can, including your new patio if not sanded properly. Polymeric sand creates an impenetrable sand joint and represents the best defense available against unwanted vegetation.

#### Insect protection

Without the proper protection, ants will take up residence in the spaces between pavers. Like weed prevention, polymeric sand forms an impenetrable barrier against ant and insect tunneling.

### LIKE ANY DECORATIVE EXTERIOR SURFACE, PAVERS AND LANDSCAPE TILES AREN'T IMMUNE TO THE EFFECTS OF TIME AND USE.

#### Keep your investment clean and beautiful

BBQ grease, motor oil, suntan lotion, fertilizer granules, bird droppings, leaf stains, paint and tire marks conspire to dull the beauty of decorative pavement. Sealing products are the optimal prevention against discoloration caused by weathering, UV rays and salt. Over time, the corrosive forces of nature can take a toll on pavers. Applying a protectant slows the march of time.

#### Make surfaces easier to clean

The time and effort required for regular cleaning or preparing to entertain is dramatically reduced if your pavement is protected. Sealers are the ultimate protection against oil and other stains.

#### Choose your look

You can choose the look of your patio, path or drive by the product used to protect its surface. A wet-look or semi-gloss sealer enhances color while matte or natural-look sealers preserve its original appearance. No matter what look you choose, sealing is the essential final step in your project.
